

Ship Happens: A Comprehensive Study on Port Activity in the Philippines

The nutshell plot presents the monthly port movement of the top 10 busiest ports (out of 26) in the Philippines from 2019 to 2026. As shown, the Port of Manila records the highest level of activity significantly, which is expected given its location as the country's capital. This is followed by Villanueva, Davao, Batangas City, Subic Bay, Cebu Calaca, Iloilo, the Pagbilao LNG Terminal, and Iligan. Furthermore, monthly port activity is seen to vary across locations, which reflects the differences in function and demand in different ports. However, the significantly higher port traffic of the Port of Manila creates an outlier in the dataset, which influences the overall trends and displays July and August as the busiest month.
